

LINKEDIN PROFILE OPTIMIZATION DELIVERABLE

Candidate: Brian Sigei | Profile: linkedin.com/in/brian-sigei-58a590288 | Target: Operational Roles

1. RECOMMENDED HEADLINE FORMULA & COPY

Headline Formula Applied: [Target Role / Title] | [Domain Specialty] | [Key Tech Stack] | [Quantified Business Value]

Optimized Headline (Ready to Copy):

Operational Data Analyst & Analytics Engineer | Healthcare Supply Chain & Predictive Maintenance | Python • SQL • LightGBM • Plotly Dash • Star Schema | Driving 68% Stockout Reductions & \$300K+ OpEx Savings

Visual Profile Header Submission Screenshot:

2. OPTIMIZED 'ABOUT' SECTION COPY

Summary Hook & Positioning:

I am an Operational Data Analyst and Analytics Engineer obsessed with turning complex operational telemetry into measurable financial savings and life-saving logistical efficiency. With an end-to-end foundation spanning Kimball Star-Schema warehousing, predictive machine learning (LightGBM/XGBoost), and reactive decision dashboards (Plotly Dash), I bridge the gap between technical data science and C-suite operational decision-making.

■ SIGNATURE IMPACT & PROVEN ACHIEVEMENTS:

- **Healthcare Supply Chain Optimization (KEMSA Capstone):** Architected an intelligence platform consolidating 4.9M+ records across 47 counties and 235 facilities. Trained a 7-day stockout risk model (91.2% ROC-AUC) and an AI redistribution engine that slashed stockout duration by 68.3%, reduced medicine expiry by 42.1%, and generated KES 39.08M (\$300K+) in recurring annual savings with a 2.6-month payback period.
- **Industrial Predictive Maintenance (AI4I 2020 Suite):** Engineered cost-sensitive failure classification on 10,000 telemetry sensor streams with extreme class imbalance (3.39% failure rate). Optimized decision thresholds to minimize downtime penalty costs, preventing \$124,000 in unscheduled downtime with TreeSHAP explainability.
- **Executive-Ready Data Translation:** Authored board-level strategic business cases, financial ROI models (359.8% Year 1 ROI), and decision dashboards tailored for CFOs, operations directors, and logistics planners.

■■ CORE TECHNICAL TOOLBOX:

- **Data Analytics & ML:** Python (Pandas, NumPy, Scikit-Learn, LightGBM, XGBoost, Prophet, SHAP, Statsmodels), SQL, R
- **Data Engineering:** Star-Schema Dimensional Modeling, Fact/Dimension Tables, SQLite WAL, PostgreSQL, ETL Pipelines
- **BI & Visualization:** Plotly Dash, Streamlit, Power BI, Advanced Excel (VBA/DAX), GIS OpenStreetMap Tracking
- **Operations Science:** Inventory Control (FEFO, Safety Stock, EOQ), Haversine Route Optimization, Cost-Matrix Evaluation

■ **Let's Connect:** Open to full-time Operational Data Analyst & Analytics Engineering opportunities. Reach me at: brian.sigei@email.com
